

## GLOBAL SOLUTIONS

### International Overview

In today's global business environment it is essential that enterprise-wide organizational resiliency is achieved and maintained, and if necessary business recovery and continuity are successful. Multinational businesses require a solution that encompasses internationally recognized frameworks, standards, and regulations that can be supported across the globe as well as functionality for complex organizations. RecoveryPlanner provides the internationally recognized Resiliency software, RPX, along with professional services, delivered locally through our network of established certified international partners.

### Global Solutions - Consulting & Software

RecoveryPlanner's solutions are designed to accommodate the full complement of organizational resiliency, recovery and continuity requirements of organizations, regardless of location and size. RecoveryPlanner's world-class software "RPX," has All-in-One functionality for Business Continuity Management (BCM), Disaster Recovery (DR), Operational Risk Management, Emergency Management, Automatic Notifications, Cyber Security Response Planning, Vendor Management and Compliance. RPX is utilized to standardize, simplify, and assist with the management of these processes. RPX easily integrates with your other Enterprise Risk Management and GRC efforts.

### Global Experience

RecoveryPlanner's Business Continuity Consulting advises and develops integrated and sustainable programs for major organizations throughout the world. Our certified Planners and Partners located globally have extensive experience with Business Continuity and Risk and have worked in a variety of industries and sectors, both public and private, and with organizations of all sizes.

Leveraging the experience of many successful deployments, RecoveryPlanner brings together the RPX software with a global implementation team to manage the most complex deployments utilizing proven methodologies to meet your particular and unique requirements. The RPX system is designed to support localization and automatically detect the user's language of preference which can be switched with a click. Help Desk Support is available in multiple languages and supports all time zones. Utilizing the cloud in internationally hosted SOC 2 certified data centers assures high availability, security, and performance around the globe.

Guided by recognized international Risk & Business Continuity frameworks such as ISO 31000, 22301 & 22317, DRII, CSA Z1600, AS/NZ HB 292-2006, Singapore TR19, BCI's GPG, etc., RPX and our Professional Consulting Services provide a structured framework that simplifies and improves overall continuity compliance and management processes.

### Global Recognitions - Leadership & Innovation

RPX is internationally rated as a global Leader for Business Continuity software by Gartner's Magic Quadrant for Business Continuity Management Program (BCMP) Solutions. RPX is also winner of DRI International's Awards of Excellence for "Planning Software of the Year" and "Service Provider of the Year" and has been awarded numerous Export Awards, including the highest one by the US Department of Commerce.
